# INTRODUCTION TO HTML

| Name: | PETER MILES ANTHONY L. LAPORRE | Date: | 08/10/2023 |
|-------|-------------------------------|-------|------------|
| Program: | CPE | Section: | A361 |

**Intended Learning Outcomes:**
1. Create an HTML file.
2. Give examples of HTML5 tags.
3. Compose HTML5 code that can create images, links, media, and tables.

Create a simple HTML webpage with the following:
1. doctype
2. head
3. title – My First HTML Webpage
4. body
   - nav – Add four links, they can go anywhere you like or nowhere at all.
   - section – Favorite Foods (with images)
   - section – Achievements (include progress bars to signify the status of achievement)
   - section – More About Me (description about yourself)
5. footer – This should contain the following:
   - Laboratory Task 1 – Introduction to HTML
   - CPE143L Web Design and Development Laboratory

Checklist for grading:
1. Is the doctype included correctly? (<!DOCTYPE html>)
2. Is there a head tag with a title for the page?
3. Is there a body tag?
4. Is there a nav tag with four anchor tags inside?
5. Is the Favorite Foods section complete with an h2 heading and four unordered list items?
6. Is the Achievements section complete with an h2 heading and three progress bars?
7. Is the More About Me section complete with an h2 heading and details and summary tag?

<html>
    <head>
        <title> My First HTML Webpage </title>
    </head>
    <body>
        <nav>
            <a href="https://youtube.com"> Youtube Site </a>
            <a href="https://iopwiki.com"> GFL Data site </a>
            <a href="https://fanfiction.net"> fanfiction site </a>
            <a href="https://github.com"> GitHub site </a>
        </nav>
        <section>
            <h2> My Favorite Foods </h2>
            <p> Adobo </p> </br>
            <img src="Chicken_adobo.jpg" width = "300" height = "300"> </br>
            <p> Scabetche </p> </br>
            <img src="scabetche.jpeg" width = "300" height = "300">
            <p> Bicol Express </p> </br>
            <img src="bicol_express.webp" width = "300" height = "300">
        </section>
        <section>
            <h2> My Achievements </h2>
            <p> Finish Studying </br> <progress value = "60" max = "100"> </p>
            <p> Make my parents proud and happy </br> <progress value = "40" max =
"100"> </p>

        </section>
        <section>
            <h2> More About Me </h2>
            <p> I conserve my energy. I talk when you talk to me. If you're worth the
energy, then good. </p>
        </section>
    </body>
    <footer>
        <h2> Laboratory Task 1 - Introduction to HTML </h2>
        <h2> CPE143L Web Design and Development laboratory </h2>
    </footer>
</html>
```

# INTRODUCTION TO HTML

## Output:

## Findings and Observations:

In doing the activity, I was able to accomplish in making an HTML file. I haven't familiarized most of the tags and elements used in the output. Also, I've used the Mac operating system and this made me struggle in accomplishing the activity. Through more exercises and examples, I am confident to say that I could do more and make outputs excellently.
